

Recovery and Recycling of Organic or Inorganic Waste

Typical Waste Recovered

- By-products and cakes from industrial and manufacturing process
- Sludges
- Ashes
- Effluents
- Residues
- Digestate
- Composts

Market Leading Experience

Envar provides waste recovery and recycling services to the food industry, chemical industry, supermarkets, paper industry, water companies, construction industry and local authorities.

Cost Effective and Viable Solutions

Many organisations pay an increasingly high price for the disposal or recovery of waste but we have the experience to ensure you have the most cost effective solution for your circumstances.

Envar links in-depth knowledge of the properties of industrial waste and our specialist expertise in transforming waste materials for beneficial use. Envar adds value to waste and develops new markets for wastes and uses.

Environmental Compliance

We identify the beneficial properties of by-products and wastes through a rigorous and robust process of analysis and evaluation. Once we have concluded our assessments, we recycle these materials to a variety of sustainable applications and end markets. Envar is accredited to ISO14001, environmental management systems standard.

Envar Comprehensive service includes

Envar provides a rapid and efficient response, and fully trained experienced teams with a proven track record.
